

12 V 恒压驱动电源

产品优势

- 输出功率最高可达 120 W，用途广泛
- 较高的浪涌防护等级：最高 3 kV (L-N) / 6 kV (L/N-PE)

应用领域

- 适用于室内外设施
- 适合安装在非常狭小的空间

Ecodesign regulation information:

Intended for use with LED modules.
The forward voltage of the LED light source shall be within the defined operating window of the control gear in all operating conditions including dimming if applicable.

Separate control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK. For this purpose, collection points for recycling centres and take-back systems (CRSO) are available from retailers or private disposal companies, which accept separate control gear and light sources free of charge. In this way, raw materials are conserved and materials are recycled.
